

DAILY OPERATIONS SECTION ROLL UP REPORT

BRANCH: Emergency Services

DATE: September 8, 2017

Note: If you don't have anything to report for an item, list NSTR: Nothing Significant to Report

CRITICAL SHORTFALLS (people, things, systems that prevent doing the mission. JFO response: Get it ASAP)

- NSTR
-

SHORTAGES: people, things, systems that you have a need and the capacity to use. Causes degradation, but not mission prevention. JFO response: Look into it and get as able.

- NSTR
-

CONCERNS (policy, procedure, organizational flow that you do not confidently understand. JFO response: Clarify and/or find someone knowledgeable to make contact.

- NSTR
-

KEY OBJECTIVES/TASKS NOT MET: IAP work that could not get done and why. JFO response: reprogram for subsequent Operational Periods or help eliminate the obstacles to achievement.

- NSTR

LOCAL OR STATE HOT ISSUES: what you hear or see from field staff that the JFO must be made aware. JFO response: Coordinate, clarify, or dispel.

- EPA completed inspections of all 43 Federal Superfund NPL Sites in the affected area. Of these, 41 sites had no observable releases or damage, and two sites (San Jacinto Pits and US Oil Recovery) require additional follow-up.
- EPA concurred on a State of Texas plan to use insecticides containing "Naled" to spray for mosquitos if used according to label directions.
- EPA's TAGA air monitoring bus provided monitoring focused around the neighborhood adjacent to the Valero refinery in southeast Houston. No levels of benzene, ethylbenzene, toluene, xylene or chlorinated compounds were detected above the Texas TCEQ Air Monitoring Comparison Values short-term screening levels.
- Water sampling kits will be assembled by lab personnel and distributed by the EPA Community Liaison network in counties with private residential wells.
- An EPA remedial manager is overseeing the assessment at San Jacinto Waste Pits Superfund site. An EPA dive team was deployed to survey the submerged portions of the cap, and to oversee the potential responsible party.
- EPA deployed nineteen community liaisons to serve in county Emergency Operations Centers (EOCs) to assist with sharing information on post-flood hazards. Additional community liaisons will continue to be deployed.
